QUALITY YOU CAN TRUST

Hoppt Soft Concrete Cutter

HSCC150-H

Soft Concrete Cutter

Hoppt Soft Concrete Cutter is designed to provide control for random cracking of concrete slabs. The machine allows the saw cut to be done while the concrete is still "green". The cutter should be used as soon as the concrete can support the weight of the user and machine without leaving any marks or damage to the concrete surface. Usually within one to two hours of finishing and before final setting.

Features and Benefits

- Complete with blade and skid plate
- Folding handle to reduce space during transportation
- Easy access to blade shaft spanners
- Low Noise blade housing
- Long working life
- Robust frame construction
- Powered by Honda GX120

Specifications	HSCC-150-H
Dimension - LxWxH (approx. mm)	1,125 x 500 x 935
Operating Weight (kg)	35
Maximum Cutting Depth (mm)	30
Blade Size (mm)	150
Cutting Width (mm)	2.4
Engine	HONDA GX120
